XGS-PON Fiber Gateway

10G CPE Solution

Description

Targeted to the PON FTTH deployment scenario, this compact Multiplay XGS-PON Fiber Gateway equipment family features High Speed Internet, VoIP and TV (IPTV and RF Overlay) services, being the right choice for Operators and Service Providers who are willing to deliver multiple and advanced services to residential and SME customers.

This equipment architecture is based on the Rec. ITU G.9807.1 and supports full in-house multi-play services enabling Data, Voice and Video services through Ethernet, Wi-Fi, FXS, USB and RF Overlay standard interfaces. Four built-in RJ45 10/100/1000 BASE-T ports allow for the connection of devices via cable. Ultrafast device is possible via Wi-Fi access or via a LAN GE/10GE BASE-X/T port (model dependent), for Internet application such as video, email, web surfing, files upload/download and online gaming. Furthermore, one RJ11FXS ports permit the connection of two fax or voice devices featuring the SIP protocol. A useful set of built-in LEDs, provide fast and pertinent information either to the user or the installer. This ultimate and low consumption apparatus simplifies the technicians' life during the installation process while in the clients' premises via built-in routing features that avoids the need for an external third party gateway.

These equipment includes a high performance 4x4 Wi-Fi, dual band concurrent spanning 802.11 a/b/g/n/ac standards, operating simultaneously on the 2.4 and 5 GHz frequency bands, featuring the advanced MU-MIMO and DFS techniques, allowing for

an air interface throughput and range increase by mitigating the multi-user interference and the utilization of frequency bands allocated to weather radars, using dynamic frequency selection.

Altice Labs XGS-PON FGW equipment is straightforward and remotely managed/configured allowing for the optimization of Operators OPEX and the scale up deployment by starring auto provisioning mechanisms (e.g. TR-069, OMCI and DHCP).

Business Benefits

- Compact, high speed and low consumption XGS-PON FTTH Fiber Gateway for residential and SME customers;
- Multiplay services enabled including data High Speed Internet, VoIP and TV (IPTV and RF Overlay);
- Evolution of the broadband access paradigm up to 10Gbps/10Gbps (downstream/upstream) data rates;
- Powerful and enhanced WLAN interface based on MU-MIMO OFDMA 4x4 dual concurrent Wi-Fi antennas supporting 802.11a/b/g/n/ac/ax standards over 2.4GHz and 5GHz wireless frequency bands;
- Mass remote management through OMCI (G.988) and TR-069 standards, thus offering a full remote control without user intervention.

Net Weight	< 0.8kg/1.76lb
Packaging	1x Power Adapter AC/DC
Power Supply ⁽¹⁾	Primary: 230VAC, 50Hz; Secondary: 12VDC/4A + 15%

⁽¹⁾ An LPS power source is used to power the ONT equipment:

- The ONT must be powered by an External CB approved Limited Power Source (LPS).

ABOUT ALTICE LABS

Delivering key telecommunications technologies since 1950, shaping the future of technology, enabling Communications Service Providers and Enterprises to offer advanced and differentiated services to their customers and users.

Altice Labs is an innovation and transformation catalyst supported in a strong and dynamic Innovation Ecosystem. Through technology we work every day to improve people's lives and the ways in which companies do business.
