## XGS-PON CPE Solution

### Description

Targeted to PON FTTH deployment scenarios, this compact multi-play Fiber Gateway (FGW) features High-Speed Internet, VoIP, and IPTV services, being the right choice for Operators and Service Providers that want to deliver multiple and advanced services to residential customers and SMEs.

The architecture of this device is based on the ITU G.9807.1 recommendation and supports full in-house multi-play services enabling Data, Voice, and Video services through Ethernet, Wi-Fi, FXS, and USB standard interfaces. Built-in RJ-45 10/100/1000Base-T ports and built-in RJ-45 1/2.5/5/10GBase-T LAN ports connect devices via cable, complementing ultra-fast Wi-Fi access for Internet applications such as video, email, web surfing, file upload/download, and online gaming. RJ-11 FXS ports connect voice or fax devices featuring the SIP protocol. A valuable set of built-in LEDs provides fast and pertinent information to the user or the installer. This ultimate and low-consumption device also delivers embedded IoT interfacing complying with Thread, Bluetooth, Zigbee and Matter interfaces.

This device includes a high-performance Wi-Fi technology that supports tri-band concurrent operation, complying with 802.11a/b/g/n/ac/ax/be standards, operating simultaneously on the 2.4GHz, 5GHz, and 6GHz frequency bands. Advanced MU-MIMO and Dynamic Frequency Selection (DFS) techniques allow an increase in the air interface throughput and range by

mitigating multi-user interference and the utilization of frequency bands allocated to weather radars.

This FGW is fully interoperable with 3<sup>rd</sup> party OLTs. The device can be remotely managed and configured, allowing operators to optimize OPEX and scale-up deployments by featuring auto-provisioning mechanisms (e.g., TR-069, OMCI, and DHCP).

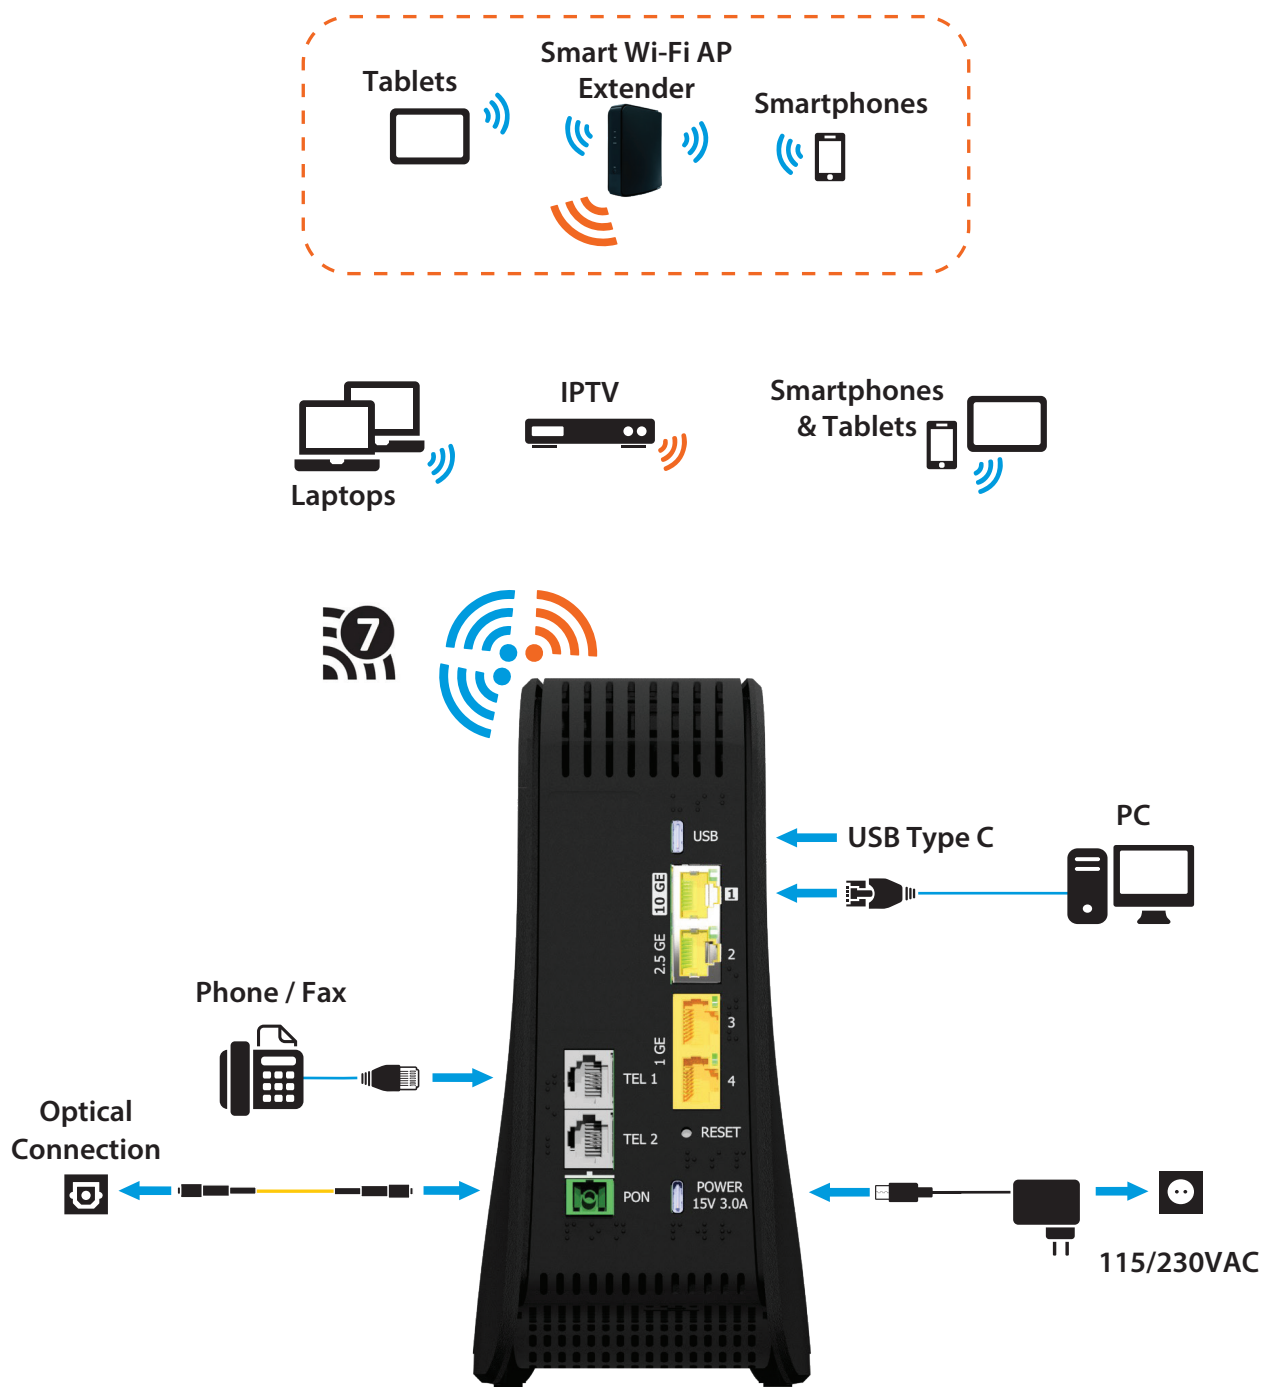

### Business Benefits
